

TeamSync PDF Viewer

100% Open Source.

No paywalls. No vendor lock-in. No server dependencies.
Integrate this high-performance PDF Viewer SDK directly into
your React applications and unlock premium features
completely free.

Uncompromised Power.

Everything you need. Nothing you don't.

Smart Annotations

High-fidelity markup, sticky notes, and freehand drawing. Transform static PDFs into collaborative workspaces effortlessly.

Cryptographic Signatures

Secure, PKI-backed digital signing usually locked behind expensive paywalls, now available natively in the browser.

True Redaction

Military-grade, binary-level data erasure. We don't just hide sensitive information—we permanently obliterate it.

Interactive Navigation

Embed custom URLs or internal page-links to build incredible navigational experiences directly inside your documents.

The Modern Developer Experience.

Engineered to eliminate legacy SDK headaches.

Headless React Hooks

Full control over your UI. Never fight a bloated iFrame again. Build your own toolbars, sidebars, and menus natively in React.

Micro-Bundle WebAssembly

Lightning-fast load times. Lazy-load only the modules you need and say goodbye to massive 10MB+ monolithic payload drops.

Memory-Leak Free

Engineered for modern SPA lifecycles. Flawless component mounting and unmounting without zombie memory consumption.

Transparent, Zero-Cost Licensing

Uncapped usage, no per-server licensing, and no opaque sales calls. Premium enterprise-grade power, 100% free and open source.

Built for the Open Web.

The architecture that makes it incredible.

100% Client-Side

Documents never hit a server. By executing entirely within the browser sandbox via WebAssembly, TeamSync guarantees instant compliance and infinite scalability.

The React Integration

Drop the viewer component into your application in under 2 minutes. Built for modern frameworks like Next.js, Vite, and Create React App.

The Developer SDK.

Powerful features unlocked with a few lines of code.

Digital Signatures

Native in-browser PKI signing supporting USB Smart Cards, hardware tokens, and local P12 certificates without external bridge services.

Dynamic Watermarking

Secure documents on-the-fly with programmatic, non-destructive watermarks before rendering or export.

Secure Redaction

Permanently remove sensitive information and PII using precise coordinate rasterization before documents leave the client.

React Integration

Seamlessly integrate the viewer into your application using our headless React components and modern hook architecture.
